## 6.0 Retention and Graduation Rates

Retention and graduation data only include degree programs, non-degree programs are not included. Data are based on headcounts, whether the student is full-time or part-time is not taken into account. This is because many students may shift between full-time to part-time during their academic career.

Retention and graduation data are currently based on an "annual" definition. If a student enrolled for at least one term in the following academic year, that student is counted as retained. Graduation rates are based on last academic year enrolled, which may be different from academic year conferred.

DEFINITIONS

COHORT COUNT: Distinct count of all new (first-time, first-year) students by BA, MA and DOC levels, by Academic Year. All academic terms of entry are included, from summer to spring.

Note that cohort data used in this section has been manually cleaned to address minor errors found in the Completion Rates in sections 5.2 and 5.3.
